

## Task 4.1 Regional and national funding sources

### D4.1.1 Report on regional/national funding sources

**Partner name: MACEF**

- **Summarise the main existing grants/subsidies/incentives for streetlight projects and ESCO companies.**

There are no existing grants/subsidies/incentives for streetlight projects and ESCO companies.

- **Insurance schemes for ESCOs?**

There are no registered companies as ESCOs in Macedonia.

- **Summarise available EU funding sources for streetlight projects.**

There is no Structural or Cohesional funding schemes in place.

Funding for energy projects is planned on national level (Second Energy Efficiency Action Plan of the Republic of Macedonia)

| Id.  | Title of EEI measure      | Expected energy savings in 2015 [ktoe] | Expected energy savings in 2018 [ktoe] | Implementing body               | Required financing in the period 2013-2015 [MDen] | Sources of financing  |
|------|---------------------------|--|--|---------------------------------|---|---|
| P. 3 | Municipal Street lighting | 1.00                                   | 1.29                                   | Municipal Local Self-government | 448.95  | Municipal Local Self-government, ESCO, Energy Efficiency Fund |

- **Which innovative financing schemes are in place?**

No revolving funds, no JESSICA funds.

- **Are there specific bottlenecks in public lighting projects realized by EPC financial model (ESCO companies) in your country and what are potential solutions?**

There are no public lighting projects realised by EPC financial model, there are only public lighting projects realised by PPP model.

- **Possibilities for establishing a regional/national fund to provide financing for smaller projects?**

There is a big possibility for establishing a national Energy Efficiency fund, but for now there isn't any.
