

EVENT DESCRIPTION

**Project Partner: Macedonian center for energy efficiency (MACEF)
and the City of Skopje**

Date & location: 23.12.2016, Macedonian Center for Energy Efficiency - MACEF

Organiser(s): MACEF and the City of Skopje

Number of Participants: 16

Summary

The main goal of the meeting was to define recommendations for EPC and PPP contracts and discuss the possibilities for further developing the EPC/ESCO market in Macedonia.

Objectives & main programme points

The event had only one objective: defining opportunities for the development of the EPC market in Macedonia in the near future. The first part of the meeting consisted of the presentation of EPC projects implemented in the framework of the Streetlight-EPC project. This aimed at giving a clear picture of the possibilities offered by this type of financing scheme. This was followed by an active discussion.

Conclusions & lessons learnt

All representatives agree that some changes in the law for public procurement would be necessary in order to enable the use of EPC in Macedonia. Furthermore, participants are of the opinion that private companies are not ready to finance projects in the public sector.
